

Enabling Trust in a Digital World

www.sedicii.com | [@gbrsedicii](https://twitter.com/gbrsedicii)

Internet Trust
does not exist

Powering the Digital Economy with a Trusted Privacy Network

- Digital Identity - must be verified **dynamically, in real-time** v's today's static, "moment in time" view.
- Blockchain - **Centralised Trust Arbiters** (e.g. Banks) being disrupted by a low cost, fast **Decentralised Cryptographic Proof**
- Customer Engagement – **Omnichannel** with **digital wallets** for **smart contracts** with fiat, digital and information assets
- Sources of Truth – **Authoritative Sources** will become foundational for financial and commercial systems
