The leader in specialist
Cameramatics solutions for
commercial fleets

Cloud platform enabling
developers to connect/share
devices from one secure place

Leading product for cyber-security
assessment and protection for
Medical Devices

Looking to the future - Hot Trends & Topics

AI Everywhere:

Consumer IoT - AI at the core - Voice platforms (battleground between Amazon Alexa, Google Assistant - seeing Apple, Samsung, Tencent and others enter this market). Autonomous vehicles...

IIOT – Machines, Oil Rigs & Assembly lines already have sensors on them, AI can be a complete game changer in these industries

IoT & Blockchain:

Decentralised Ledger technology has potential to aid the security issues associated with a massive network of connected devices & poses opportunities for IoT data exchange & general connectivity

Funding:

Evolution towards larger and more concentrated investments in smaller companies in the growth stages

The rise of Edge Computing:

Witnessing plenty of start-ups doing interesting work on edge computing and analytics (Foghorn, Mythic..) Edge computing is also being embraced by tech giants – AWS (Greengass), Microsoft (Azure IoT Edge)...
